TOP E LAVABI

Arbeitsplatten und Becken

La nuova proposta di top e lavabi segue due criteri fondamentali: materiali facili nell'uso quotidiano ma che sappiano rispondere anche a valori estetici. Dai top in cristallo stone, allo stonelight materik passando attraverso le nuove finiture legno, dove colore ed effetti materici invitano al tatto influenzando la percezione del cliente. Le pagine che seguono sono molto semplici ed efficaci: per ciascun materiale vengono indicati spessore disponibili; tutte le tipologie di lavabo possibili con relative dimensioni; tutte le varianti colore. Semplici informazioni ma fondamentali nella scelta del proprio bagno.

A new choice of materials and basins inspired by two principles: easy use and maintenance, and strong aesthetic values. Stone finish for the glass countertops, materik Stonelight and the new wood finish, tactile sensations that make it different every piece of bathroom. In the next page are clearly presented: the available materials, the thickness and sizes as well as the possible type of basins; all the available colors. These are necessary information to create an unique furniture.

La nouvelle gamme de matériaux et couleurs pour les plans et les vasques répond à deux crytéres: facilité d' entretien dans le quotidien et grand choix ésthetique. terme de couleur et de touche. Dans la suite sont présentés pour chaque matériel : les épaisseurs et les couleurs, les différentes vasques disponibles, les dimensions. Simples informations, essentielles dans le choix de sa salle de bain.

Eine neue Wahl der Materialien und Becken nach zwei Grundsätzen: einfache Bedienung und Wartung und starke ästhetische Werte: Stein Fertigstellung der gläsernen Arbeitsplatten, materik Stonelight und die neuen Holz Finish, fühlbare Empfindungen die es jedes Stück anders machen von Badezimmer. Auf der nächsten Seite sind klar dargestellt: die verfügbaren Werkstoffe, Dicke und Größe sowie mögliche Art von Becken; alle verfügbaren Farben.
Dies sind notwendige Informationen eine einzigartige Einrichtung zu schaffen.
